

# All of That - Life, Health, Delusion and Philosophy Problems in University Context - Princeton and Harvard

By Johnathan Sequira

## I. The Context for a Professor and Student is always Princeton

When I am away from Princeton I am still part of it. That's what a professor should know, as students know. We are ex-students but we are still students. We grew up there, we belong there, we are about it.

## II. Princeton Health, Delusion even Congealment or in fact Any Problem - All problems

In fact one is just going through a bad phase, one will pull through by working it out.

## III. Method and Excellence - Mathematics - or Philosophy - your choice - Basketball

All aspects are related to basketball - the team going low, creates a low in the leader - Michael Jordan, the losing of the match creates a dynamic that requires more answers - I mean this is basketball.

## Harvard Replies in Business Standards

### I. Business going well - I am still losing perhaps

I won the business, I won it all - but my health is not the best.

### II. I am working it out - I am Jordan

Imagine racing through it creating accounts, typing and writing it out. Some people give speeches instead. That is America, and that is God.
